

As a homeowner or small business owner  
in Arlington Hts...

**You could be the next target**  
**to have your property seized by your very own government.**

Arlington Hts. is using the brute force of government against the  
businesses at International Plaza to seize their property.

4 years after designating International Plaza "blighted" -- which it is NOT-- Arlington Hts. is now  
threatening to use eminent domain to force them out **against their will** and turn over their property  
to a private developer promising a big box retailer.

**These business owners have dedicated their lives to achieve the 'American Dream' only to  
have their own government take it all away.**

The official Master Plan for Arlington Heights is now for Village trustees to "**take an  
active role in acquiring property**" (page 28) using TIFs because "**it allows the use of  
eminent domain**" (page 38) to force business and residential property owners to submit  
to the will of the trustees.

**This is welfare for rich developers !**

**Tell them using Eminent Domain against International Plaza is  
Shameful and Un-American.**
